Parent Support Group

Often times the stress of parenting can become overwhelming and debilitating. Parents experiencing increased levels of stress can find themselves stuck between the strong desire to remain flexible and responsive to their children while being confronted with the feeling that they're out of gas and struggling to get their own needs met. We have found that this stress can lead parents to isolated places in their lives filled with anxiety and self-doubt. Our parent support group is aimed at helping parents stay connected in a space that allows them to express their emotions, develop new strategies and tools to help with their parenting skills, and find impactful support from hearing the experiences of others and relating through empathy and encouragement.
